

ABOUT UNIVERSITY OF CINCINNATI MEDICAL CENTER

As part of the Clifton Campus of UC Health, Greater Cincinnati's academic health system, University of Cincinnati Medical Center has served Greater Cincinnati and Northern Kentucky for nearly 200 years.

Each year, hundreds of thousands of patients receive care from our world-renowned clinicians and care teams. Our physician experts utilize the most advanced medical knowledge and technology available, providing a level of specialty and subspecialty medical care that is not available anywhere else in Greater Cincinnati.

UC Medical Center is also home to medical breakthroughs—our physician experts conduct basic, translational and clinical research, leading to new therapies and care protocols, and connect patients to the latest and most advanced treatments.

With our partners at the University of Cincinnati and UC College of Medicine, UC Medical Center has been home to many medical firsts, including the first FDA-approved prescription antihistamine, Benadryl; the oral polio vaccine, the country's first training program for emergency medicine physicians and development of the clot-busting drug tissue plasminogen activator, or tPA—the first FDA-approved treatment for stroke.

UC Medical Center is home to Greater Cincinnati's only Level I adult trauma center, which includes the right mix of specialists and medical resources available at a moment's notice for a wide variety of the most complex medical conditions and injuries.
