AQUATIC PROGRAMS are those with a white background. All group sessions are eight weeks long.

Call (513) 418-2727

PROGRAM/REGISTRATION INFORMATION

Aquatic Exercise Programs

Adult Learn-to-Swim—For improving or learning swimming strokes.

Arthritis Exercise—For flexibility, range of motion and endurance.

Back Strengthening—For core trunk strengthening and stability.

Community Open Pool—For independent exercise. No lap swimming available.

Deep-Water Exercise—For advanced cardiovascular conditioning.

Low-Impact Water Exercise—For improving balance coordination, endurance and strengthening.

Stroke Class—For increasing functioning levels of those who have suffered a stroke.

Water Exercise—For general conditioning, mobility, endurance and strengthening.

Wellness Exercise Programs

(See class fees at right)

The Community Wellness Center—The Center is a well-equipped fitness facility staffed by wellness professionals. The Center includes treadmills, stationary bikes, ellipticals, nusteps, strength training equipment and much more.

Mon., Wed., 7 a.m. - 3 p.m.

Fun with Fitness—This class will build cardiovascular fitness and muscle tone by utilizing free weights, tubing and resistance balls. Emphasis will be on core strengthening to improve posture and balance.

Parkinson's Exercise Class—This class will focus on stretching and strengthening exercises designed to improve balance, coordination, mobility/gait, posture and flexibility.

Next Step—This fitness program is specially designed for individuals discharged from Daniel Drake Center Outpatient Therapies. Appropriate clients need to demonstrate independent and safe use of the equipment or be accompanied by a caregiver.

Mon., Wed., Fri.: 7 a.m. – 3 p.m.

Stroke Rehab Class—This class will build strength, improve posture and balance as well as increase mobility and enhance activities of daily living.

Upper Extremity Forced Use Class—This class is for individuals that have had a stroke and want to focus strictly on their affected arm. It will focus on the weaker arm to grasp, move, and manipulate a variety of objects. "Forced Use" has been shown to improve function and strength.

Individualized Programs
